

OPERATIONAL PROCESS MANAGEMENT

Learn how processes can be managed and improved in a goal-, competence- and resource-oriented manner

Objectives

The goal of this seminar is to impart knowledge and practice-oriented tools of Operational Process Management (OPM). The management of processes is an essential task of managers and employees responsible for process performance and execution.

The participants learn how processes can be managed and improved in a goal-, competence- and resource-oriented manner. In addition, essential methods are taught that foster acceptance and support among all process participants. Our didactic concept is always geared towards underpinning the methodical seminar content with reflected application of the acquired knowledge. Group work, case studies and the exchange of experiences among participants play an important role.

This seminar can be conducted as classroom training, as blended learning or as an 100% digital training. In this variant, participants complete a five-day classroom training.
