

DIGITIZE AND AUTOMATE PROCESSES

Learn how to digitize and automate your processes

Objectives

In this seminar, participants will learn to examine processes for automation potential. Furthermore, you will develop criteria for feasibility and try to implement this with workflow systems. You will get an overview of the BPM tool market and learn about the possible application areas of selected technologies.

Target group

- Internal and external consultants
- Managers and employees Corporate and Personnel Development
- Managers and employees Process Management
- Business Analysts
- Employees Information Technology
- Process owners who are responsible for the digitization of their processes
- Managers or employees involved in the implementation of digital projects and processes

Content

- Presentation of various digitization technologies with their advantages and disadvantages (process mining, RPA, workflow systems).
- Special features of process modeling with BPMN 2.0 regarding digitization and automation
- Technology clusters in the BPM market with assignment to process management glasses
- Examine processes for automation potential
- Create return-on-investment calculations for automations
- Achieve savings potential and investment security through process digitization
- Automate processes with workflow systems
- Success factors during implementation
- Practical exercises and examples

Please bring your Wi-Fi-enabled laptop for the practical exercises.

Prerequisites

The seminar requires advanced knowledge of Business Process Model and Notation (BPMN) 2.0, as this notation is used as the standard for describing and modeling processes.
